****TRANSPONDER KEY NOTE:**

PT-Key has preloaded factory code and key must be added to the car's on-board computer using On-Board-Programming instructions only.

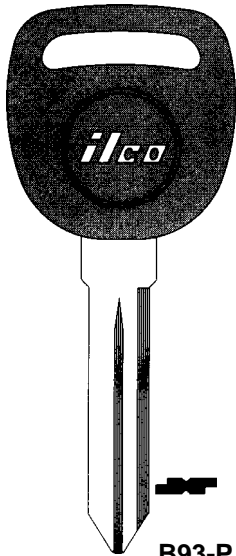

PT5-Key has no code loaded and must be duplicated from an original or working duplicate using the RW2 device. There is no limit on the number of working keys when using this way since the car has no way of telling the difference between the keys.

ILCO DOMESTIC VEHICLE BLANKS

LOOK-A-LIKE KEY BLANKS

Look Alike key blanks are made as close to the original as legally possible. They would meet the industry standards of an original, except they do not carry the original or ILCO logo. They are also normally less expensive than the original equipment key blanks.

*These Transponder Key Blanks allows the locksmiths the ability to duplicate GM cars without the presence of the actual automobile. It allows duplications that exceed the manufacturers 10 key restrictions.

Keys are programmable with the Jet ETD-1 and ETD-1-JR Electronic Decoder and Duplicator.
